

## Review of Proposed Culvert or Stream Crossing Project

This information is needed to determine if the proposed project is technically sound. After you've completed section 1, secure the signature of your local ODF or ODFW biologist.

This form may be submitted along with the Small Grant application, or with the first payment request. OWEB will void grant agreements for projects the ODF or ODFW biologist determines to be inadequate. If the biologist recommends design modifications, OWEB will not release project funds until these modifications are made and the biologist has signed off on a new form.

### 1. TO BE COMPLETED BY THE GRANTEE

Applicant Name: \_\_\_\_\_ Project #: \_\_\_\_\_

Project Name: \_\_\_\_\_

### 2. TO BE COMPLETED BY LOCAL ODF or ODFW BIOLOGIST

Please check below the one that applies:

I have reviewed the application listed in section 1 above and associated project designs and have determined the project to be technically sound as described.

I have reviewed the application listed in section 1 above and associated project designs and have determined the project to be technically sound provided the following modifications are made to the project design:

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

I have reviewed the application listed in section 1 above and associated project designs and have determined that the project is not technically sound and requires major re-design before being funded by OWEB.
