

Oregon Watershed Enhancement Board

Investments in Jackson County

OWEB MISSION

"To create and maintain healthy watersheds and natural habitats that support thriving communities and strong economies."

WHAT OWEB DOES

- Provides grants in local communities to preserve water quality and improve fish and wildlife populations.
- Monitors and manages information, and reports on implementation of the Oregon Plan for Salmon and Watersheds.

OWEB FUNDS COOPERATIVE CONSERVATION

- OWEB-funded projects are voluntary and incentive-based.
- OWEB builds local partnerships and empowers communities to develop solutions.

Partners include:

- Private agricultural and forest landowners
- Urban, rural, and industrial landowners
- Tribes
- Watershed councils
- Soil and water conservation districts
- Cities and counties
- Business and industry
- Conservation groups
- Public interest groups
- State and federal natural resource agencies

OWEB BOARD

- OWEB is led by a 17-member policy oversight and decision-making board.
- Members represent the public-at-large, tribes, state natural resource agency boards and commissions, OSU Extension, and federal natural resource agencies.

OWEB STAFF

- OWEB has 24 Salem and five field staff positions who handle the agency's grant management, monitoring and reporting programs, policy development, and fiscal control responsibilities.

Oregon Watershed Enhancement Board

Investments in Jackson County

Local Economies and Communities Benefit

- **Each dollar** OWEB grants for watershed council support generates an additional **five dollars** for watershed projects in the local community.
- **Eighty percent** of OWEB grant funds are spent in the county in which a grant is awarded, supporting **local** businesses through contracting and the purchase of supplies and equipment, and supporting family incomes.
- Watershed enhancement projects **support jobs** locally and increase the **long-term sustainability** of the local economy.

OWEB Funding Sources

- Constitutionally dedicated Ballot Measure 66 State Lottery revenues
- Congressionally appropriated Pacific Coastal Salmon Recovery Fund
- Salmon License Plate proceeds

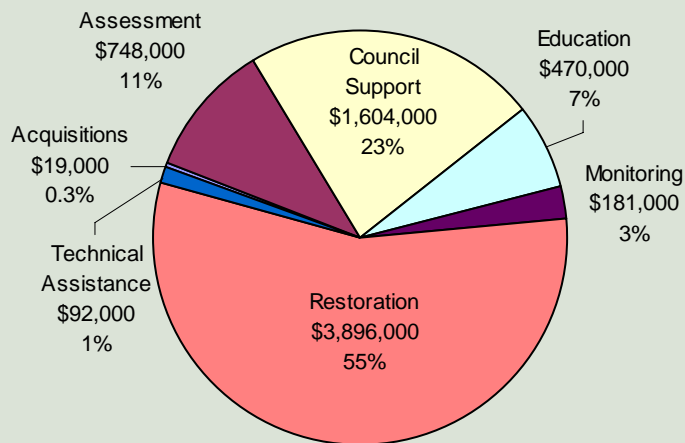

OWEB Competitive Grant Awards

From 1999 through 2007, OWEB awarded nearly \$176.6 million in competitive grants for watershed enhancement projects statewide.

Since 1999, OWEB has awarded \$7 million to grants in Jackson County.

The largest portion of the dollars awarded in Jackson County went to on-the-ground restoration (55%), including projects to improve fuel loads, fish passage, instream and riparian conditions, and water quality.

Jackson County Competitive Grant Awards by Project Type

Total = \$7 million (1999-2007)

Other OWEB Statewide Programs

Conservation Reserve Enhancement Program (CREP). Since 1999, OWEB has provided more than \$6 million as state match funding for Oregon CREP projects. CREP provides funding to agricultural landowners to establish riparian vegetation along streams.
